

Good evening,

This is Mrs. Federico, Principal of Doering School with an important message. As you know, teachers have all created Google Classroom pages where enrichment, practice and review lessons have been posted. We strongly encourage your children to log onto these pages and join in the lesson work designed to engage them. We would like to make sure all students remain connected to their classrooms, supported and that they do not fall behind. We are currently working on a plan with teachers to add parents and guardians to your child's Google Classroom pages so that you will also be able to access their lesson work. If your child needs a device, we currently have a limited supply of devices still available for students to use at home. At this time, we only have enough for one device per household. Please contact the main office of your child's school or email me at [sfederico@agawamed.org](mailto:sfederico@agawamed.org). I will arrange device pick up by appointment until our inventory is exhausted. We know you are working with your children on the practice of social distancing in order to stay healthy and safe.

We all miss our students and wish you all well!

Mrs. Federico

Principal, Roberta G. Doering School
